Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 September 2007.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/7/2007 has been entered.

Drawings

2. The drawings were received on 8/8/2007. These drawings are acceptable.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Independent claims 1, 7 and 14 all include the newly recited claim language "providing a mold whose surface includes micro-channels and an array of flat bottomed depressions having a depth no greater than 500 microns". While the originally filed specification discloses a multi-chamber chip device that includes micro-channels (22) being connected to the sample chambers or depressions (21) and a mold (62) having an array of flat bottomed depressions (61), the originally filed disclosure fails to disclose that the mold (62) used to form the chip device includes a surface having microchannels. Applicants' responses filed 3/9/2007 and 8/8/2007 do not point out where support for this new claim limitation can be found. As a result, the originally filed disclosure fails to adequately convey to one of ordinary skill in the art that at the time of filing the invention, that a mold whose surface includes micro-channels and an array of flat bottomed depressions having a depth no greater than 500 microns was considered to be applicants' invention. Claims 2-6, 8-13 and 15-20 are also rejected based on their dependencies from claims 1, 7 or 14.

Response to Arguments

5. With respect to the rejection of Claims 1-20 under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement, Applicants' make the following comments:

"Reconsideration is requested of the rejection of claims 1, 7, and 14 under 35 USC 112 on the grounds that the limitation "at least one

micro-channel being connected to each of these depressions" (which was added as part of our previous response) is not supported by the specification. Said limitation has now been deleted from these claims." (See page 10 of Applicants' response dated 8/8/2007).

In response, the Examiner maintains that the amended claims still include new matter for the reasons set forth in the 35 USC 112, first paragraph, rejection above. Note Applicants' responses filed 3/9/2007 and 8/8/2007 do not point out where support for this new claim limitation can be found. Pages 11-12 of the originally filed specification which discuss the mold device and molding method are silent with respect to the presence of micro-channels in a surface of the mold.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William H. Beisner whose telephone number is 571-272-1269. The examiner can normally be reached on Tues. to Fri. and alt. Mon. from 6:15am to 3:45pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gladys J. Corcoran can be reached on 571-272-1214. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
